

```
1 let list = document.querySelectorAll(".navigation li");
2 function activeLink() {
3   list.forEach((item) => item.classList.remove("hovered"));
4   this.classList.add("hovered");
5 }
6
7 list.forEach((item) => item.addEventListener("mouseover", activeLink));
8
9 // menu toggle
10 let toggle = document.querySelector(".toggle");
11 let navigation = document.querySelector(".navigation");
12 let main = document.querySelector(".main");
13
14 toggle.onclick = function () {
15   navigation.classList.toggle("active");
16   main.classList.toggle("active");
17 };
18
```
